Prasanth Bathala

pbathala3@gatech.edu | /in/prasanthbathala/ | prasbathala | +1 470-929-6149 | Atlanta, GA

Education

Georgia Institute of Technology, Atlanta, GA — Aug 2022 - May 2024
Masters in Electrical Engineering and Computer Science - Machine Learning and AI — *GPA: 4.0/4.0*

Courses : *Natural Language Processing (Research), Statistics and Machine Learning, Deep Learning, Adv. Programming Techniques, Computer Vision, Advanced Data Structures and Algorithms*

Professional Experience

Applied Scientist Intern | Amazon — Sept 2023 - Present
*Applied Scientist Intern at Alexa AI for **LLM** applications in **Conversational agents*** — *Bellevue, WA*

- Developed a robust pipeline to run **multi-node** batch training and inference on Sagemaker. Evaluated and tested for fine-tuning (SFT, LoRA) Alexa LLM (**7B, 13B, 30B**), **Llama v2**, **Flan - T5** for Query Rewriting (**CQR**) task.
- Research on efficiently tailoring Large Language Models for Text Generation using **RL-based** policy methods.

Artificial Intelligence (AI) Engineer Intern | RadicalX — June 2023 - Aug 2023

- Led a 5-member team in developing a potent anti-cheat and anti-fraud system, blending **SVM** and **BERT** models.
- Built a robust **Zero-Shot** intent classifier based on **BLINK** architecture for career coach chatbot based on **GPT-4**.

Software Engineer | Infosys — Nov 2020 – Aug 2022

- Reduced CRUD extraction time by designing an automation framework and implemented a development tool using **Python** and **SQL**; earned appreciation award for saving over 4 days of manual effort.
- Contructed Python scripts for data migration and cleaning, particularly for **Teradata** and **IBM DB2** transfers.

Research Experience

Graduate Research Assistant | Pathology Dynamics Lab — Jan 2023 – Present
Guide: Prof. Cassie S. Mitchell, Department of Biomedical Engineering, Georgia Tech — *Atlanta, GA*

- Involved in curation of new text dataset of 10K records for comprehensive data analysis and model development.
- Optimized multi-label text classifiers using **RoBERTA** and **active learning** achieving 60% F-1 score with limited labeled data.
- Developed **PubMed BERT**-based relationship extraction model for the new dataset, benchmarking the results.
- Worked on Information Retrieval for meta-analysis using LLMs based on **Open AI API** like **ChatGPT** and **GPT-3**.
- Developing a **Multi-label Hierarchical Contrastive learning** approach for Biomedical Entity Linking.

NLP Research Assistant | Janus Lab — Feb 2023 – May 2023
Guide: Prof. Hsiao-Wen Liao, Department of Psychology, Georgia Institute of Technology — *Atlanta, GA*

- Conducted Exploratory Data Analysis (EDA) on **1K+** text files using regex, pandas and stemming.
- Implemented transfer learning on transformer models like **BERT**, **Spacy** to detect racial bias in each document.
- Enhanced a text summarization model utilizing **BART** to visualize insights from interview transcripts.

Projects

Alzheimer Detection and Progression on ADNI | *Multimodal data, 3D CNN, TCN* — Jan 2023 – May 2023

- Built **3D CNN** model based on **RESNET18** for detection of Alzheimer's achieving 88.58% accuracy.
- Implemented Encoder-decoder network with **TCN** and **BiLSTMs** achieving 75% F1 score for risk prediction.
- Created user-friendly applications using **streamlit** for deploying ML models. [*Code*]

Depression Detection through Audio, Visual & TextualData | *SVM, CNN, LSTM* — Dec 2022 – Dec 2022

- Programmed a multimodal depression detection model using **SVM, CNN, and LSTM**.
- Achieved a **70%** improved F-1 Score with early fusion of audio, video, and textual data using **LSTM** [*Report*].

Technical Skills

Programming: Python, SQL, C/C++, MATLAB, CUDA, Java, HTML/CSS
Frameworks: Tensorflow, Pytorch, Deepspeed, Accelerate, Node.js
Libraries: NumPy, Pandas, Matplotlib, Scikit-Learn, NLTK, Spacy, Gensim, OpenCV, Keras, HuggingFace, Scipy
Developer Tools: Git, Amazon Web Services (AWS), Docker, AWS S3, VS Code, Visual Studio

Publications

- **BioSift: A Dataset for Filtering Biomedical Abstracts for Drug Repurposing**, *published at SIGIR 2023*
- **A Comprehensive Evaluation of Biomedical Entity Linking Models**, *accepted at EMNLP 2023*
- **A Hierarchical Contrastive Learning approach for Biomedical Entity Linking**, *Working Paper*
